

Student Task Intro Exemplar

Welcome to our outdoor studio!

You are all artists in your own right, bringing creative ideas and unique personal style to all that you do!

As a community of artists you have been appointed the task of designing a visually creative learning space using natural materials.

You are currently assigned the geographical area of your school and school grounds, in Airdrie, Alberta.

As you explore the surrounding community of Airdrie, consider how outdoor spaces have been arranged to be visually appealing. What design will ensure our natural environment remains ecological and beautiful?

Your job will be to create a proposal that considers the following three essential questions:

1. How does caring for our natural environment contribute to our wellbeing?
2. How can we design a visually creative outdoor learning space using natural materials?
3. What role can I take on throughout this inquiry to gain knowledge through Research, collaboration and demonstration of learning in a way that is meaningful to me?

We value teamwork here in the studio and encourage our artists to work in groups of 1, 2, 3 Or 4. Your proposal can take the form of a digital media presentation, a poster, a pamphlet, a brochure, a dramatic performance, a public service announcement or even a song! The possibilities are endless.

Let your personal style shine as you explore our natural environment and expand our outdoor learning space!
